PROCESS CONTROL AND AUTOMATION

Macroview Browser Access

The Browser Access module allows the MacroView system to be accessed securely through Microsoft Internet Explorer Version 5.5 or later. It authenticates using the Windows user name.

The logon to the MacroView servers is configurable so different users can have different security level access to the systems.

Benefits of browser access:

- Simple Deployment
- Secure access
- No X Windows software required
- Cost effective access to MacroView
- Faster than X Windows access

The screenshot shows a Microsoft Internet Explorer browser window displaying the 'Kwinana MacroView Systems' interface. The main window shows a process flow diagram for 'CSBP Kwinana' with various units labeled (GG, ENV, ANPP, KAP, L7, L4, L5, L2, L3, L11, SMP, REC-T, TQM, PM, AL). An inset window shows a 'Trends' graph for 'ROCK BINS' with a line chart and a data table below it.

| DATE | TIME | PER1 | PER2 | PER3 | PER4 | PER5 | PER6 | PER7 | PER8 |
|----------|----------|------|------|------|------|------|------|------|------|
| 02/01/05 | 12:42:00 | 85.2 | 79.6 | 70.0 | 15.2 | | | | |
